HEMNATH M *Software Engineer*

(B.E in computer science and engineering, Apr2017 - May2021)

Portfolio | hemihari15@gmail.com | 8754696107 | 17B Jawahar Street, Panruti

Professional Summary

Result-driven Front-End Developer with **2+ years of hands-on experience** designing and implementing **responsive, user-centric web applications** using **Angular, React, TypeScript, and JavaScript**. Skilled in modern **UI/UX practices, performance optimization, and scalable architecture.** Adept at solving **real-world business problems** through **efficient code and agile collaboration**.

Technical Skills

Frontend: HTML, CSS, Bootstrap, React, JavaScript, TypeScript, Angular 12+, Angular Material, Ag-Grid.
Backend: Node.js, Express.js
Database & API Tools: MongoDB, Postman, Swagger.
DevOps & Tools: Git, Bitbucket, FileZilla

Professional Experience

Front-End Developer* | Kriyatec IT Solutions, Chennai | *Oct 2022 – Apr 2025

- Designed and developed a report entry module, reducing manual effort by 40% using JSON Formly.
- Built responsive UIs with Angular, Material Design, and TypeScript for improved user experience.
- Implemented offline-first functionality using IndexedDB for application resilience.
- Added robust form validation and error handling for high data quality.
- Collaborated in Agile teams with backend developers and PMs to ensure timely delivery.

Technologies: Angular, JSON Formly, TypeScript, Material Design, IndexedDB, MongoDB.

Projects

The Professional Couriers – Courier Management Form Module

Tech Stack: *Angular, JSON Formly, AG Grid, TypeScript*

- Developed a **dynamic courier form UI** (Add/Edit/Delete) using Formly.
- Integrated AG Grid with **advanced filtering, sorting and pagination**.
- Followed **modular Angular best practices** for scalability.

Klassguru – Music School Management System

Tech Stack: *Angular, Formly, Responsive Design, TypeScript*

- Built **dynamic scheduling forms** with **centralized schema control.**
- Designed a responsive UI for staff and students.
- Added **schedule conflict validation** with **reusable components**.

Mandate Management System | 2023

- Built a **banking module** to validate **Aadhaar, UPI,** and **account details** via secure **NPCI/NSDL integration.**

Production Parts Approval Process | 2022

- Developed a **document tracking system** for supplier quality approvals.

Portfolio Website – Personal Project

Developed a **responsive portfolio** using **React** to showcase skills and projects. Focused on **UI/UX design**, smooth navigation, and **mobile accessibility**. Live: https://hemnath.pages.dev

"From concept to deployment, I enjoy turning product ideas into user-friendly web apps using Angular, React, and modern UI tools. Open to start-up, agencies, and individuals seeking innovative front-end development".
